- HTML and CSS knowledge
- Programming in Python, Java, SQL, PHP
- Database management
- UI design with Figma (rapid prototyping)
- Google Tag Manager (GTM) and Google Analytics 4 (GA4)
- Claude Code and AI automation workflows
- Next.js, TypeScript, Git
- RPA management and AMS operations

LANGUAGES

Italian: native
English: advanced
French: basic

PROFILE

Project Management Officer transitioning into AI Automation Consulting roles. Experience in project management, analytics and process digitalization, combined with hands-on development and automation skills built also through personal projects.

EDUCATION

Master's Degree in ICT, Social Innovation, Communication and New Technologies

University of Turin, 2023–2024

Thesis on UX/UI design, based on user research and Figma prototyping. Further study of programming (Python, Java, PHP) and multidisciplinary skills in sociology, economics and politics.

Diploma in Computer Science and Telecommunications

Istituto Avogadro, Turin, 2019/2020

Foundations in programming (Java, C++, HTML, CSS, SQL), computer architecture, networks and communications.

PROFESSIONAL EXPERIENCE

Project Management Officer (PMO)

Aeonvis, February 2025 – Present, Turin

Managed analytics projects using Google Tag Manager (GTM) and Google Analytics 4 (GA4) to track user behavior on client applications. Coordinated communication between business users and developers for a Robotic Process Automation suite, under an AMS model. Led a contract e-signature digitalization project, from requirements analysis through to production release.

PERSONAL PROJECTS

Personal Portfolio — sito-personale

Ongoing project

Built a full-stack website in Next.js/TypeScript, with a private dashboard, a multilingual (IT/EN) public homepage and a training module. Designed a multi-agent system with Claude Code (PM, UX/UI, Developer, Curator) to automate development workflows.

Industrial Automation Interface Design

Gamba Automazioni, 2023

University internship focused on designing interfaces for SCADA and PLC systems, for monitoring and controlling industrial processes, with attention to operator-screen usability.

Personalized IT Support for Elderly Users

2023

Tailored IT support for elderly users: needs assessment, personalized training, troubleshooting, and day-to-day assistance with software, applications and devices.

Drone Production/Assembly for Visual Shows

FlyFire, 2021

Assembled components, installed flight and control software, tested, calibrated, repaired and maintained drones, working alongside the project team.

Barista

Bar-Pizzeria "Delu", 2016–2021

Prepared coffee, cocktails and pizza by the slice; managed customer service, supplies, cash handling and venue upkeep.
